

# TOOL STORE

This responsive theme is in yellow color with new and cool designed with product oriented design. It would be more suitable for those online store who want to make 30% more extra sales in the title of tools, hardware, parts.

Here, we have clear and clean design with logo in left side with few links in right side at top corner. Image slider is full screen to focus occasional banners and featured product. With first page user will get full information about store and it's special, new and featured products. On of the advantage of this theme is it is easy to install and won't take more than 5 minutes.
